

GAGAN SHARMA

Bengaluru, Karnataka

☎ +91 7006387398 ✉ gagansharma11564@gmail.com 🌐 GitHub 🔗 LinkedIn

Data Scientist with hands-on experience in Machine Learning, Deep Learning, Computer Vision, and Data Analytics. Proficient in Python, SQL, TensorFlow, Scikit-learn, Pandas, NumPy, Power BI, and Tableau. Experienced in Exploratory Data Analysis (EDA), Feature Engineering, Data Preprocessing, Predictive Modeling, and Model Evaluation. Skilled in developing end-to-end machine learning solutions, building interactive dashboards, and transforming complex datasets into actionable business insights.

TECHNICAL SKILLS

Programming: Python, SQL, C++

Modeling, Data Preprocessing, Data Cleaning, Data Wrangling

Machine Learning: Classification, Regression, Clustering, Feature Engineering, Model Evaluation, Hyperparameter Tuning, Scikit-learn

Data Visualization: Power BI, Tableau, Matplotlib, Seaborn

Deep Learning: CNN, TensorFlow, Keras, Computer Vision,

Databases: MySQL, PostgreSQL, MongoDB

Data Science: EDA, Statistical Analysis, Predictive

Tools: Git, Streamlit, Flask, Jupyter Notebook, Excel, VS Code, ServiceNow

PROFESSIONAL EXPERIENCE

Savantis Solutions India Pvt. Ltd.—Deployed at HCL Tech (Pfizer) Dec 2025 – July 2026, Hyderabad

Analyst - Full Time

- Analyze operational datasets and generate Excel-based reports to support business decision-making and project tracking.
- Maintain and validate large-scale study access records, ensuring data accuracy, consistency, and regulatory compliance.
- Perform data quality checks, identify discrepancies, and collaborate with stakeholders to resolve data-related issues.
- Monitor workflow metrics and contribute to process improvements that enhance reporting efficiency and operational performance.
- Work with cross-functional global teams to streamline data management processes and support business operations.

Wyreflow Technologies

Oct 2024 – Nov 2024, Bangalore

Tester Intern

- Collected, cleaned, and validated test data across 50+ test cases, improving QA reporting accuracy by 20%.
- Designed and maintained dashboards and reports to monitor software performance, user behavior, and defect trends.
- Collaborated with developers to provide data-backed insights, reducing average bug resolution time by 15%.
- Documented detailed test outcomes and defect logs, enhancing overall software reliability and release quality.

Learnbay

Jan 2024 – Sept 2024, Bangalore

Data Scientist Intern

- Performed exploratory data analysis (EDA) on large-scale datasets using Python, SQL, and Pandas to extract actionable business insights.
- Built interactive dashboards in Power BI and Tableau to track KPIs, trends, and business performance metrics.
- Conducted feature engineering and data preprocessing, improving model prediction performance by 15%.
- Developed and deployed a CNN model in TensorFlow achieving 92% accuracy on image classification tasks.
- Optimized data pipelines to reduce data processing time and improve overall workflow efficiency.

Cisco

Sept 2023 – Oct 2023, Bangalore

Networking Intern

- Configured switches, routers, and end devices for secure and efficient network access across lab environments.
- Implemented IPv4/IPv6 addressing schemes and troubleshoot connectivity issues, reducing network downtime.
- Prepared structured analytical reports for management using Excel and SQL queries, supporting data-driven network decisions.
- Applied OSI model principles to enhance network operations, troubleshooting, and performance monitoring.

PROJECTS

Financial Risk and Fraud Analysis | GitHub

- Built and trained a Deep Neural Network (DNN) using TensorFlow for fraud detection on 284K+ transactions.
- Performed feature scaling and preprocessing on highly imbalanced financial transaction data.
- Evaluated model performance using Precision, Recall, F1-Score, and ROC-AUC metrics.
- Applied class-balancing techniques to improve fraud detection effectiveness.

Supply Chain Inventory Optimization | GitHub

- End-to-end inventory optimization using Python, SQL, and Power BI
- Performed inventory valuation, turnover ratio analysis, and demand vs supply gap detection using SQL
- Built 3 Power BI dashboards — Executive Summary, Inventory Health, Reorder Actions

Bank Loan Granting — EDA and Classification | GitHub

- Performed in-depth EDA on 5000+ samples with 14 features including 3D plots and map visualizations
- Built classification models (Logistic Regression, Decision Tree, Random Forest) for loan approval prediction
- Performed feature engineering, model evaluation, and hyperparameter tuning to improve prediction accuracy.
- Handled data cleaning, anomaly correction, and feature dependency analysis

Attendance System — Face Recognition | GitHub

- Built a real-time face recognition attendance system using OpenCV and face recognition library
- Dynamically encodes faces from images and compares them with webcam feed in real-time
- Auto-marks attendance to CSV with name and timestamp

Contractor Segmentation Analysis | GitHub

- Built a contractor analysis tool using Python and MySQL for data-driven contractor selection
- Filters contractors based on price, safety record, experience, and 30+ parameters
- Generated Seaborn visualizations for multi-criteria comparison and risk analysis

CERTIFICATIONS

AI Force for Software Development – Gen AI (2026)

100 Days of Code: The Complete Python Pro Bootcamp – Udemy (2024) | Verify

Data Analysis Batch – Cisco (2023) | Verify

EDUCATION

SDM College of Engineering And Technology

Bachelor of Engineering in Civil Engineering — CGPA: 8.05/10

Dharwad, Karnataka

2023

ACTIVITIES & INTERESTS

- Active contributor on **GitHub** with 10+ repositories covering Machine Learning, Deep Learning, and Computer Vision projects.
- Self-learner, continuously exploring new AI tools and frameworks through online courses and personal projects.
- Participated in team-based hackathons and collaborative coding events during engineering.

Interests: Machine Learning Research, Artificial Intelligence, Data Visualization, Open Source
